### **Response to Amendment**

\* After carefully reviewing the entire application, the claims have been restricted: thus, the restriction requirement as set forth below.

### **Election/Restriction**

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: **Independent Claims 1, 18, 32, 47, 53, 67** and intervening claims, drawn to a method for data verification, comprising:

receiving an input block of data together with a modulo-based input error detection code associated with the input block, the input block comprising a plurality of sub-blocks;

selecting a subset of the sub-blocks to be included in an output block;

determining an error correction term based on the selected subset; and

concatenating the selected subset of the sub-blocks together with the input error detection code and the error correction term to generate an output block for conveyance to a destination processor.

Species II: **Independent Claims 16, 45, 71** and intervening claims, drawn to a method for error detection, comprising:

receiving a block of data having a modulo-based input error detection code and an error correction term appended thereto;

calculating an output error detection code of the block;  
combining the input error detection code and the error correction term to produce a modified error detection code; and

comparing the calculated error detection code to the modified error detection code so as to detect an error in the block.

\* Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

\* Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

\* Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

\* Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in the rejection under 35 U.S.C. 103(a) of other invention.

\* Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
